
Mosaic Signal Analysis Guide

Facts current as of 2026-11-07

The views and what they hide

View	Use it for	It hides
Triad dots / density	Where stories sit; empty corners	Density is smoothed and relative to the chart
Triad % strip / AVG	A one-line summary	Clusters and empty space
Dyad stats	A warning light: mean ≠ median, big Std Dev	The shape
Dyad histogram / dot strip	Humps; click to read	—
Stones Averages	Quick summary	Splits
Stones Individual	Every placement; click to read	—
Stones Density	Where placements bunch	Which stone
Narrative explorer	Search, Top Words, every story	Only the exact word you search
Responses page / export	Reading every story	—
Filters	Slicing by context or dyad range	Hides any group under 10 stories; hold the same line off-screen
Cross-tab	Group sizes; rolls tiny groups into Other	Stories and placements

The passes

shapes → surprises → slices → read (all in small regions; a spread of 10–15+ in big ones; across boundaries) → text vs placement → name it.

Outliers

rare positions, text–placement mismatches, different voices. Clues and bright spots, never findings alone.

Pattern Card

pattern · where · how many (of total) · stories · confidence · what it isn't.

Never

"x% of staff"; a score; a benchmark; a cause; a slice under 10 stories; a guess at who wrote anything.
