Mosaic Signal Framework Design Checklist

Facts current as of 2026-11-07

Story question

- [ ] Heading, description and prompt ask one thing
- [ ] One recent moment; the organization's own words; good, bad or mixed welcome; what happened, not who
- [ ] Doesn't name the answer; one story only
- [ ] Word limits set as guidance (not enforced); minimum low

Triad

- [ ] Three pulls on one limited thing; nobody can be high on all three
- [ ] Every corner admit-able; one or two words each
- [ ] No rating words; no people as corners

Dyads

- [ ] One dimension; concrete ends; both ends honest
- [ ] Participant's voice; no shaming end
- [ ] Two dyads measure different things

Stones

- [ ] Three to five distinct items
- [ ] Both axes labelled "low → high" with an arrow
- [ ] Description says stones can be left out

Context

- [ ] Only comparisons you've promised; few broad options; optional
- [ ] No combination you'd discuss falls under 10 stories

Whole survey

- [ ] Story first, then questions about it, then context; Shuffle Blocks off
- [ ] Welcome text matches the distribution (MS-M3)
- [ ] Framework design add-on bought before launch, if wanted

Mosaic Signal Fielding Checklist

Facts current as of 2026-11-07

Plan

- [ ] Band chosen from an estimate of **stories**; the cap can't be raised later
- [ ] Every group you'll discuss can reach 10+ stories
- [ ] Launch date booked inside the deadline (about two months from purchase); client has the date

Distribution and promises

- [ ] Channels chosen (link, QR, huddles, email) and noted for later
- [ ] Anonymous Responses setting matches what the welcome text promises
- [ ] Welcome text: time, one story, what's collected, what-not-who, who reads it, voluntary

Before launch

- [ ] Phone preview; full test run
- [ ] Test responses generated, checked, **deleted**
- [ ] Shuffle Blocks off

During

- [ ] Questions frozen
- [ ] Trend watched; one mid-point reminder
- [ ] First ten stories read for misunderstandings
- [ ] Cap watched if late groups haven't had their turn

Always

- [ ] No filtered views or quotes from groups under 10 stories
- [ ] Never try to identify anyone

Mosaic Signal Analysis Guide

Facts current as of 2026-11-07

The views and what they hide

View	Use it for	It hides
Triad dots / density	Where stories sit; empty corners	Density is smoothed and relative to the chart
Triad % strip / AVG	A one-line summary	Clusters and empty space
Dyad stats	A warning light: mean ≠ median, big Std Dev	The shape
Dyad histogram / dot strip	Humps; click to read	—
Stones Averages	Quick summary	Splits
Stones Individual	Every placement; click to read	—
Stones Density	Where placements bunch	Which stone
Narrative explorer	Search, Top Words, every story	Only the exact word you search
Responses page / export	Reading every story	—
Filters	Slicing by context or dyad range	Hides any group under 10 stories; hold the same line off-screen
Cross-tab	Group sizes; rolls tiny groups into Other	Stories and placements

The passes

shapes → surprises → slices → read (all in small regions; a spread of 10–15+ in big ones; across boundaries) → text vs placement → name it.

Outliers

rare positions, text–placement mismatches, different voices. Clues and bright spots, never findings alone.

Pattern Card

pattern · where · how many (of total) · stories · confidence · what it isn't.

Never

"x% of staff"; a score; a benchmark; a cause; a slice under 10 stories; a guess at who wrote anything.

Mosaic Signal Readout Outline

Facts current as of 2026-11-07

1 The question and the storytellers

what we asked; how many stories; how they were collected; dates.

2 Patterns (3–5)

for each, the chart, the count of stories with its total, one or two paraphrased stories, confidence.

3 Differences between groups

only groups of 10+ stories.

4 Bright spots and outliers

as examples.

5 Limits

stories not staff; no score or benchmark; relationships not causes; who may be missing; channels used.

6 Options and next steps

what to try; next wave (same framework, timed to the change); other tools.

Phrases that work

"x of y stories placed…"; "stories in this area describe…"; "this goes together with…"; "worth testing in wave 2".

Phrases to avoid

"x% of staff"; "score"; "benchmark"; "proves"; "caused"; "which team said…".
