Mosaic Practitioner Code of Practice

As a Mosaic practitioner, I will:

1 Protect the people who answered.

- I won't try to work out who said what.
- I won't show results for a group below the report's minimum.
- I won't help anyone else do either of those things.
- When a client asks "who said that?", the answer is always no.

2 Tell respondents the truth about confidentiality.

In a Leadership Mosaic 360, boss feedback is attributed to the boss. I'll say so before launch. I won't promise "everything is anonymous" when it isn't.

3 Claim only what the evidence supports.

- The research linking culture to performance comes from comparable frameworks. It is not Mosaic-specific validation, and I'll describe it that way.
- I'll treat a pattern as a hypothesis for dialogue, not as proof of cause.

4 Keep development separate from evaluation.

I'll position a 360 as development. I won't help a client use it for pay, promotion or performance-review decisions.

5 Respect data rights.

- I'll honour a client's choice to stay out of the Mosaic benchmark, and their consent decisions at checkout.
- I'll never mix test responses into real results.

6 Use the tools as designed.

- I won't alter locked items.
- I won't copy a purchased survey to reuse it.
- I won't share a partner code with a client. It is for my own purchases only.

7 Describe culture without judging it.

Culture isn't good or bad. I'll describe what it does and what it costs.

8 Close the loop.

I'll encourage every client to share what they learned with the people who took part.

Mosaic Tile Reference Card · current as of 2026-10-25

The twelve tiles (Culture Mosaic and Leadership Mosaic)

#	Tile	Tagline
1	Change Ready	We are flexible and make change happen
2	Future Focused	We're always looking out for opportunity and change on the horizon
3	Customer	We understand our customers and adapt to serve them
4	Purpose	Our purpose is clear and inspires us
5	Strategy	Our strategy gives direction to our work
6	Values	We have strong values that actually influence our behavior
7	Efficiency	We excel at delivering great outcomes
8	Decisions	We make sound, timely decisions grounded in data and clear thinking
9	Collaboration	Collaborating in teams and across our business is the norm
10	Empowered Teams	Our people are supported to do their best work, and expected to do it too
11	Capability Development	Our superstars are not just born, they're made
12	Learning	We are always learning on the job, from experience and from others

The four dimensions

Adapt
"Capable of adapting to the needs of the market and the customers we serve."

Inspire
"Aligned purpose, strategy, and values provide clarity on organizational direction and how to get there."

Deliver
"Execution enabled by effective collaboration, sound decisions, and a focus on efficiency."

Enable
"People and teams are empowered and capable to work at high standards."

Both instruments use these twelve tiles in these places. Culture Mosaics created before the late-2026 update keep Community in Adapt and Customer in Deliver in every report, including ones generated later.

Quick facts

	Culture Mosaic	Leadership Mosaic 360
Items	54	57
Scale	1–5	1–7
Open questions	2	3

- A tile score runs 0–100, and a dimension score is the average of its 3 tiles (Culture Mosaic).
- Tile size shows the score band (84–100, 68–83, 52–67, 36–51, below 36).
- Never compare raw Culture Mosaic and Leadership Mosaic scores side by side.

Research, in one honest line: "Associations from research on comparable culture frameworks (CVF, Denison); not Mosaic-specific."

Mosaic Certification · ©2026. All Rights Reserved.

Mosaic Tool Selector · current as of 2026-10-25

	Culture Mosaic	Culture Progress Monitor	LM 360 (+ Team Report)	Mosaic Signal	Culture Dig
Answers	What is our culture like?	Has it changed in the 1–3 areas we worked on?	How is this leader (team) showing up?	What's really happening, in people's own words?	Why is our culture this way, and what is it doing?
Level	Organization / subteam	Organization / subteam	Leader (Team: 3–25 leaders)	Organization / group	Organization
Data	54-item survey (1–5) + 2 open questions; optional subscales, custom questions, breakdowns	Re-asks 1–3 domains' items from a prior CM	57 items (1–7) + 3 open questions; Self, Boss, Peer, Direct Report, Other	One story + questions about the story (triads, sliders, grid)	7 research teams (interviews, documents, observation) + organization-wide stories
Time per person	~10 min	Shorter than a CM	~15–20 min per rater	A story plus a few questions	Researchers: 2–3 weeks of fieldwork; everyone else: one story
Output	Designed PPTX report, diamond, benchmark percentiles	PPTX: then vs now, meaningful-change labels, trend	Individual PPTX per leader; Team Report PPTX	Interactive charts linked to stories (no scored report)	Findings report (PDF), up to 4 waves
Benchmark	Joins by default after close	Never	Leader joins by default after close	Never	No
Must have first	—	A SurveyCraft CM in the same org with ≥5 responses	Team Report: ≥3 leaders with closed 360s	—	A Culture Dig license
Watch out	Count your smallest group	Waves are different people; "no meaningful change" ≠ failure	Bosses are named; tell raters before launch	Read distributions, not just averages	Buying online = software, not facilitation

Quick decision path: one leader or a leader team → LM 360 / Team Report. Organization: broad picture → CM; did it change → CPM; stories, fast → Signal; deep why, 8–12 weeks → Culture Dig.

Mosaic Confidentiality Thresholds · current as of 2026-10-25

Tool	Threshold	What happens below it
Culture Mosaic / CPM	**5** completed responses for a whole-organization report	Report won't generate
Culture Mosaic / CPM	**10** respondents for a subteam (filtered) report	Report refused (CPM: in every wave)
Culture Mosaic / CPM	Minimum group size **3** (default; can be raised to 50, never set below 3)	Group rolls into "Other"; cells show "—" or "*"
Culture Mosaic	**5** responses per group for AI comment summaries by group	No group summary; group summaries never quote anyone
CPM	**5** answers in each wave for "Then / Now" quotes	No quotes; whole-org level only
LM 360	**3** raters per Peer / Direct Report / Other category (can be raised, never lowered)	Category folded; comments withheld; excluded from "All Others" if the folded pool is still under 3
LM 360	Boss: **named**, max **2**	Any further boss is counted with Others, unnamed
LM Team Report	**3–25** leaders; Self shown only if **3+** leaders self-rated; each rater category **3+** pooled	Self / category pages drop out
Culture Dig	**10** stories per domain to score or quote	"Too few to score"; no quotes
Mosaic Signal	**10** stories in any filtered group	Charts and stories hidden; cross-tab rolls it into "Other"
Mosaic Signal / Culture Dig charts	Density view needs **3+** responses; Culture Dig report scatter plots need **10+** points	View unavailable / plot suppressed
Benchmark (CM)	**10** respondents to contribute	Doesn't join
All tools	Test responses never count	Excluded from floors and benchmarks

Never: guess who said what · show a suppressed group by other means · lower a threshold to "get a result" for a small team.

Culture Mosaic Setup Checklist

current as of 2026-10-25

Scope (before ordering)

- [ ] Decision the results will inform, and the date it's needed
- [ ] Population in scope (census) and invitation count
- [ ] Expected responses = invitations × realistic rate; tier chosen with headroom
- [ ] Add-ons agreed (subscales, custom questions up to 5, demographic subreports, readout), and expectations set for what appears in the deck
- [ ] Launch date within about 2 months of the order
- [ ] Who buys and claims (that person becomes the organization's owner)
- [ ] Research-database consent discussed with the buyer

Before you publish

- [ ] Demographic block edited to the organization's real categories, with small units grouped
- [ ] Leader question and leader values set, as agreed with the sponsor
- [ ] Minimum group size: 3 (default), or raised for sensitive cuts. Never below 3.
- [ ] Custom question text entered, if bought
- [ ] Subreports configured and subscales turned on, if bought
- [ ] Welcome and thank-you messages customised, including the anonymity statement
- [ ] Taken the survey yourself end-to-end
- [ ] Test responses deleted

Launch

- [ ] Published
- [ ] Roster uploaded and invitations sent, and/or link or QR distributed
- [ ] Invited count accurate (for link distribution)
- [ ] Automatic reminders set (every 3/5/7 days, 1–3 rounds)
- [ ] Senior-leader message scheduled

During fieldwork

- [ ] Response rate tracked by group
- [ ] Cap warnings at 80% and 100% watched; upgrade if needed
- [ ] Requests for small-team reports declined (subteam floor is 10)

Close and report

- [ ] Survey closed (manually or by close date)
- [ ] Report generated **after** close, so it joins the benchmark (unless excluded)
- [ ] Deck downloaded within 7 days and stored
- [ ] Readout or debrief scheduled before the deck is circulated

Mosaic Certification · ©2026. All Rights Reserved.

Culture Progress Monitor Setup Checklist

(current as of 2026-10-25)

Is a CPM the right tool?

- [ ] The client ran a Culture Mosaic **in SurveyCraft**, in this organization, launched, with 5+ completed real responses
- [ ] The client has acted on specific domains since the baseline
- [ ] Enough time has passed for the work to reach people's experience (6–9 months recommended)

Scope

- [ ] 1–3 domains chosen, matching the action plan
- [ ] Respondent count estimated; larger counts handled by the Mosaic team
- [ ] Sponsor understands: no add-ons, no PSI page, never joins the benchmark
- [ ] Demographic answer choices will **not** be changed from the baseline

Order (website)

- [ ] Signed in with the account that ran the Culture Mosaic
- [ ] Correct baseline picked (check title, month and response count)
- [ ] Domains ticked, respondent count entered, partner code only if it's your own purchase
- [ ] Launch planned within about 2 months

Run

- [ ] Message to staff explains why you're asking again and that it's anonymous
- [ ] Roster or link distributed; automatic reminders on
- [ ] Response rate tracked; compare it with the baseline's rate

Report

- [ ] 5+ completed responses (10+ per wave for any subteam report)
- [ ] Report generated and downloaded
- [ ] Change labels read correctly (see M8): "No meaningful change" ≠ "no change"

Leadership Mosaic 360 Setup Checklist

(current as of 2026-10-25)

Agree with the sponsor

- [ ] Purpose: development, **not** performance review, pay or promotion
- [ ] Who sees the report (the leader plus the debrief practitioner, unless otherwise agreed and disclosed)
- [ ] What happens next: debrief and a leader-owned development plan
- [ ] Debrief option chosen

Set up

- [ ] One seat per leader, assigned ("For me" or "for someone else")
- [ ] Workflow chosen: Standard (leader nominates) or Self-assessment only (admin manages)
- [ ] Invitation emails reviewed and copy **approved**: development purpose and who sees what
- [ ] Deadline set 2–3 weeks out; automatic reminders on (every 3/5/7 days, 1–3 rounds)

Before launch: confidentiality

- [ ] Leader told: **boss feedback is named** (Boss 1, Boss 2)
- [ ] Each boss told **before** they answer that their feedback is attributed
- [ ] No more than **2** Bosses; others categorised honestly as Peer or Other
- [ ] 5–7 invited per category the leader cares about (3 completions needed to show)
- [ ] Leader understands: a category under 3 is hidden and its comments are withheld

Launch (Standard workflow)

- [ ] Leader completes the self-assessment first
- [ ] Leader sends the heads-up note from their own email and marks "I've sent it"
- [ ] Invitations sent a day or two later

During

- [ ] Leave chasing to "Remind pending raters"; the portal shows counts per group, not who is pending, and the leader shouldn't chase raters personally
- [ ] Reminder around week 1
- [ ] Readiness email received (3 per group)

Close and report

- [ ] Leader's feedback closed (treat it as final)
- [ ] Report generated **after** close (joins the benchmark unless excluded)
- [ ] Practitioner reviews the report before the debrief
- [ ] Delivered in a debrief conversation; leader saves their copy (stored copy kept 60 days)

Team Report (optional)

- [ ] 3–25 leaders, each closed with at least 1 completed rater; membership final
- [ ] Sponsor briefed: no ranking, no names, no verbatims

Talk track: the boss-attribution conversation

(use before every launch)

With the leader (2 minutes)

"Before we send anything, one thing about how your report works. Your peers, direct reports and others are always grouped, and a group only appears if at least three people respond. Your boss is different. Their ratings and comments appear in your report under their name, as 'Boss 1'. If you have two bosses, both are named.

Two consequences:

- *First, at most two bosses are named. If you report to more than two, you choose which two; the portal shows who is "Named in your report" and who is "Counted with Others", and anyone counted with Others is anonymous, like your peers.*
- *Second, I'll make sure your boss knows their feedback is attributed before they answer.*

Any questions about that?"

With each boss (1 minute, before invitations go out)

"You'll be invited to give feedback for [Leader] as their boss. I want to be clear about one thing: in the Leadership Mosaic, boss feedback isn't anonymous. Your ratings and comments appear in [Leader]'s report under your name. Feedback from everyone else is grouped and anonymous. Please answer as candidly as you would in a one-to-one development conversation."

If someone asks why bosses are named

"[Leader] already knows who they report to, so pooling one or two bosses wouldn't hide anything. It would just make the feedback harder to use. Naming it keeps it useful and honest."

If a boss would rather be anonymous

"That's a fair concern. You can still give feedback honestly and constructively. If you'd prefer not to take part as boss, tell me, and we'll discuss it with [Leader]. What we can't do is list you as a peer to make you anonymous, because that would distort the peer view."

Consistent with the product

This talk track matches what bosses read in their invitation, on the consent screen and in the privacy notice: "your name appears next to your feedback in their report."

MOSAIC SIGNAL DESIGN GUIDE

Mosaic Certification · Facts current as of 2026-10-24 · **The principle:** people tell a real story, then interpret their own story. They never rate the organization.

1 Pick a framework

- How work really feels: individual vs. team vs. organization, formality → **Organizational Culture Probe**
- What customers experience, from first contact to follow-up → **Customer Experience Journey**
- Whether people are willing, able and ready for a change → **Change Readiness Assessment**
- Quick stories at an event, workshop or site visit → **Quick Narrative Capture**
- Something none of these fit (experienced designers) → **Blank survey**

2 Write the story prompt

- One concrete experience, not an opinion.
- A specific moment and time window: "a recent time when…"
- Neutral, so good, bad and mixed stories all fit.
- About what happened, not who.
- Word limits people will actually meet.

3 Write the questions about the story

- **Triad:** Three things that compete for a limited resource. All three reasonable; no "right" corner.
- **Dyad:** Both ends are places a real person would choose. Where the middle sits is the finding.
- **Stones:** Three to five items, maximum. Label both ends of both axes.
- **Context:** One or two simple questions (e.g. tenure, site) so you can compare groups.

4 Before launch

- [ ] Preview on a phone, and take it yourself end to end.
- [ ] Respondent band fits the audience. The survey closes to new answers at the cap.
- [ ] Launch date booked within two months of purchase.
- [ ] Client knows there's no scored report and no benchmark.
- [ ] Distribution plan: link, QR code at huddles, or email.

5 Reading results

1. Shape before average: concentrations, gaps, splits.
2. Name what's surprising.
3. Read the stories in that area before naming it.
4. Say the pattern in respondents' terms, as a hypothesis to discuss, not a verdict.

Avoid: quoting a mean without its distribution; calling visual concentrations "computed clusters"; trying to work out who wrote a story.

Mosaic Certification · ©2026. All Rights Reserved.

CULTURE DIG PROGRAM PLANNER

Mosaic Certification · Facts current as of 2026-10-24

Before you start

- [ ] License route confirmed: invoiced (the Mosaic team runs it) / website (software only) / licensee add-on / Coaching Studio
- [ ] Client understands that a website purchase is **software, not facilitation**
- [ ] Waves included confirmed, plus when more would be bought

People

- **Program Lead** · Full control: _____
- **Second Lead (backup)** · Recommended: _____
- **Facilitator** · Read-only. Right for an advising consultant: _____
- **Team Members, 2–4 per domain** · Every Team Member needs a domain

Seven teams (Team Members · Deadline)

- Espoused Beliefs and Values: _____
- HR Management Systems and Processes: _____
- Organizational Artifacts: _____
- Organizational History: _____
- Organizational Stories: _____
- Rituals and Rites of Passage: _____
- Stakeholder Relations: _____

Dates ("Suggest dates" defaults, counted from the start date)

- Start (Phase 1 → 2) · Week 0: _____
- Team findings due · **+3 weeks**: _____
- Stories close · **+5 weeks**: _____
- Analysis · **+6 weeks**: _____
- Report due · **+8 weeks**: _____

Story collection

- [ ] Story collection set up and linked
- [ ] At least **one approved prompt per domain** (the link opens after the first approval)
- [ ] Prompts ask about **what happened, not who**
- [ ] Optional: Culture Mosaic linked, so prompts on its 3 lowest subcomponents surface first
- [ ] Link channels: email / Slack / Teams / huddles / QR code

Closing actions

- Pause stories → **Close collection** (reversible)
- Finish → **Mark program complete** (closes the link; reopening the program does **not** reopen it)

Report

- [ ] Story patterns: "Fill from stories" → review → Save
- [ ] Story summaries approved
- [ ] Analyze → human edit (save as you go)
- [ ] Quotes: approved, verbatim, none from a domain under 10 stories
- [ ] Draft → In review → **Final** (this freezes the report) → Print / Save as PDF

Next wave

6–12 months later · identical follow-up wording · "Reuse last wave's prompts".

FRONT: CULTURE DIG FIELD CARD

Your job: gather evidence about how culture really works in your domain. Document it; don't judge it.

Every observation has three parts

- **Source:** role and context. 🔒 **NEVER a name.** For example, "Clinic coordinator, team meeting".
- **Quote:** as near to verbatim as you can.
- **Theme:** a short label. Reuse the team's wording for the same pattern.

One entry per piece of evidence, not one per interview.

Good questions

- "Tell me about a time that could only have happened here."
- "What happens to someone who…?"
- "How did you learn that's how things work here?"

BACK: BEFORE, DURING, AFTER

Before: read your domain guide (focus, 4 research questions, 3 methods). Tell interviewees that their words may be quoted by role, never by name.

During:

- Ask for stories, not opinions.
- Note artifacts. **Ask permission before photographing people.**
- Don't record names of people mentioned either.

After:

- Enter observations the same day.
- Write your synthesis. It becomes your domain's report section.
- **Submit only when ready**, because it locks the workspace.

Remember: "Culture is not good or bad. Describe what it does and what it costs."

Mosaic Certification · ©2026. All Rights Reserved.

READING THE CULTURE MOSAIC REPORT

one page · current as of 2026-10-25

Before you read anything

- Methodology box: Invited / Responded / Response Rate. "Not tracked" means the rate is unknown, so don't guess it.
- Is the benchmark showing? Percentiles and typical markers need at least 5 benchmark organizations.

The numbers

- **Item mean:** 1–5 (Strongly Disagree → Strongly Agree). Reverse-scored items are already flipped, so higher is always better.
- **Tile / dimension score:** 0–100 = (mean − 1) ÷ 4 × 100. A dimension is the average of its 3 tiles.
- **%ile:** your item average ranked among benchmark organizations' averages (1–99).
- **Typical marker:** the median of benchmark organizations. A reference, not a target.
- **N:** answers to that item. Leader-only items show leaders' N only.

Tile and heatmap bands

84–100 · 68–83 · 52–67 · 36–51 · 20–35

Read in this order

1. Diamond shape: strongest and weakest dimension and tile.
2. Spreads within a dimension (e.g., Purpose vs. Strategy).
3. Item pages: which items drive low or high tiles?
4. Leader vs. non-leader gaps.
5. Group comparisons and heatmaps: whole-organization issue or local?
6. Comment themes: what explains the numbers, and what's missing from them?
7. PSI: readiness for change (check how close the unrounded score is to the band edge).

Symbols

— fewer than 3 answered · † leaders only · * reverse-scored · "Other" = groups below the minimum size

Never

report a rolled-up group · reconstruct a hidden number · convert Many / Several / A few into percentages · claim Links to Performance shows cause.

READING THE LEADERSHIP MOSAIC REPORT

one page · current as of 2026-10-25

The numbers

- **Item mean:** 1–7. Skipped answers are left out, never counted as 0.
- **0–100:** (mean − 1) ÷ 6 × 100.
- **%ile:** against other leaders in the Mosaic pool, for the same rater type. Needs at least 30 leaders. Clipped to 1–99.
- **Typical band:** pool mean ± 1 SD. Inside the band is unremarkable.
- **N:** raters who answered.

Who's in the report

- Self.
- Boss 1 / Boss 2: **named**, maximum 2, chosen by the leader. Any further boss is counted anonymously in Others.
- Peers, Direct Reports, Others: shown only with **3 or more** raters each.
- **All Others:** every non-self rater after folding.
- Folded categories (1–2 raters) count in All Others only if the folded raters together reach 3. Their comments are withheld.

Find the patterns yourself (there's no dedicated slide)

- **Blind spot** (others lower than Self): item ≥ 1.0 · tile / dimension ≥ 0.5
- **Hidden strength** (others higher than Self): item ≥ 1.0 · tile / dimension ≥ 0.5
- **Rater spread:** compare Boss vs. Peers vs. Direct Reports

Best slides for this: the grand comparison heatmap, the comparison diamonds (tile size = percentile) and the item rows.

Comments

AI summaries per group (no Self row) with a sentiment label; bullets per group; verbatim quotes only if the AI is unavailable.

Team Report

equal-weight team mean · band = range across leaders · percentile = average of the leaders' percentiles · Self only if 3 or more leaders self-rated · pooled anonymous Bosses · no verbatim quotes · unlabeled dots. **Never rank leaders.**

READING THE CULTURE PROGRESS MONITOR

one page · current as of 2026-10-25

What's compared

the baseline Culture Mosaic, then each earlier progress check with 5+ responses that re-measured at least one of the same domains, then the current check (oldest first).

Labels

- **Meaningful improvement / decline:** Welch's t-test $p < 0.05$ **and** both waves at or above the minimum group size.
- **No meaningful change:** "within normal variation".

Change

is in points on the 0–100 scale. Item figures are 1–5 means, with benchmark percentiles below.

"No meaningful change" can mean

no effect · too small to detect · too soon · too few respondents.

"Meaningful" doesn't mean

important, or caused by the programme. State the size, and avoid causal language.

Always check

- Response rate and N for each wave (a different mix of people can move scores).
- Group tables: "—" means a group is below the minimum in a wave.
- Small groups swing.

Comments slide

themes tagged NEW / GREW / STEADY / FADED / GONE, plus an overall direction. Quotes appear only at whole-organization level with 5+ answers per wave.

Never

a CPM doesn't feed the benchmark, and there's no PSI slide in a CPM.

THE FINDING CARD

fill in one per finding · aim for 3–5 findings per report

Claim
(one plain sentence, no verdicts, no names)

Evidence
(2–3 data points; name the measure and give N or source)

1. / 2. / 3.

Confidence
(High / Medium / Low, and why)

So-what
(the decision or action this informs)

Triangulation
(other tools or comments that agree or disagree)

What we don't know yet

Confidence guide

- **High:** large N, consistent across groups or measures, echoed in comments or another tool.
- **Medium:** one clear source, or a strong pattern in a modest group.
- **Low:** small group, a single item, or needs checking. Raise it as a question.

Check before using:

no suppressed groups · no identifying details · no causal or validation claims · measure named correctly (score vs. percentile vs. mean).

Mosaic Certification · ©2026. All Rights Reserved.

TEN INTERPRETATION TRAPS

keep this beside you when you build a briefing

1. Percentile ≠ score ≠ mean. Name the measure.
2. Culture Mosaic 1–5 ≠ Leadership Mosaic 1–7. Never compare raw means.
3. "Typical" is a reference, not a target.
4. Small groups swing. Check N.
5. "No meaningful change" ≠ failure.

Side 1

TEN INTERPRETATION TRAPS

Mosaic Practitioner Certification

6. Read slider distributions before averages.
7. Never rank leaders from a team report.
8. Never hunt for who said a comment.
9. Links to Performance = associations from comparable frameworks, not proof.
10. Check the response rate, especially across waves.

Side 2

THE 1-3-1 BRIEFING TEMPLATE

10–15 minutes · fill in before you build slides

Context (30 sec)

What we measured / when: _____

Who was invited / who responded / rate: _____

How much weight this can carry: _____

1 · Headline (one sentence, 25 words or fewer, about the organization, fair to the data)

What we don't know yet (1 min)

Limits (N, response rate, small or suppressed groups, single snapshot, "no meaningful change"): _____

How we'll find out (next tool / next wave): _____

3 · Findings (≈ 2 min each)

#	Claim	Exhibit (one)	Key numbers (measure + N)	So-what
1				
2				
3				

1 · The ask (1 min)

Decision: _____

Owner(s): _____

Next measurement and date: _____

Share-back to respondents (how, when, who delivers): _____

Open the dialogue: "What surprises you? What feels true?"

Pre-flight check: every number names its measure · no suppressed groups · no names or identifying details · no causal or validation claims · individual 360 data kept out of group briefings.

THE PUSHBACK PLAYBOOK

Acknowledge → **Clarify** → **Hold the line** → **Redirect**

They say	Hold this line	Sample response
"The data's wrong / biased."	Facts about who responded. No validation claims, no caving.	*"Fair question. [N] of [invited] responded, across every group. Here's what that means for how much weight it carries…"*
"Who said that?"	Anonymity is absolute.	*"I don't know, and wouldn't share it if I did. It came up [several] times. Here's how you can act on it…"*
"Which team is the problem?"	Patterns, not culprits. Only groups the report shows.	*"It's a pattern, not a team. It's lowest where [X] and [Y] meet…"*
"What's the benchmark? What's good?"	It's the Mosaic benchmark, not "the industry". There's no pass mark.	*"Compared with organizations in the Mosaic benchmark you're at the [n]th percentile. Whether that's enough depends on what you're trying to do…"*
"Fix it by next quarter."	Culture moves slowly. Use the right tool and timing.	*"Let's act now and run a progress check on the 1–3 priorities in 6–9 months. Meanwhile, here are early signals to watch…"*
(360) "A couple of people skewed this."	Rater confidentiality. N corrects the belief.	*"[n] of [n] responded, so it's not a couple of voices. What might they be experiencing?"*
"Can you lower the threshold so we can see [small group]?"	Never lower a threshold to expose a group.	*"Those groups are combined to protect the people in them. That's a promise we made, and we keep it."*
"So the programme failed?" (no meaningful change)	No meaningful change ≠ failure.	*"We can't see a change yet. That could mean no effect, too soon, or too small to detect. Here's how we'll find out…"*
