SurveyCraft Survey Practice Code

When I design and run surveys for clients, I will:

1. **Promise only the confidentiality the settings deliver.**
   I'll check Anonymous Responses and the distribution method before I write a word about anonymity in an invitation.
2. **Protect small groups.**
   I won't filter, crosstab, export or share results for a group below the survey's minimum group size, and I won't help anyone work out who said what.
3. **Ask only what I'll use.**
   Every question maps to the client's objectives. I won't collect identity or demographics "just in case".
4. **Keep test data out of results.**
   I'll delete test responses before launch and never let them into a client's charts or exports.
5. **Give the least access needed.**
   I won't invite a client into a workspace that holds other clients' surveys.
6. **Claim only what the data supports.**
   A pulse shows patterns and associations, not causes. I'll state response rates and limits.
7. **Use bought instruments as designed.**
   A purchased Mosaic survey is one launch. I won't copy or rebuild it to avoid buying another.
8. **Close the loop.**
   I'll encourage every client to share what they learned with the people who answered.

Signature _____ Date _____

Survey brief

(agree it with the sponsor before you build)

Section	What to write	Huddle pulse example
Decision	What will change because of the results	Whether to keep, expand or reschedule the huddles
Objectives	2–4, each one sentence	Reach; value; barriers; voice
Audience and size	Who, how many, how you'll reach them	Nursing and Clinic Network, 392; roster for 322, QR code for 70
Comparisons	Groups you'll report, and the minimum group size	Department; role level; minimum group size 5
Confidentiality	Anonymous or identified, and who sees what	Anonymous; results by department only
Length	Questions and minutes	9 questions, about 3 minutes
Dates	Open, close, reminders	Jun 15 – Jun 26; reminders every 3 days
Reporting	Who gets what, by when, how it goes back to staff	Alex by Jun 30; staff summary in July
Risks	Fatigue, overlap, sensitive topics	Survey fatigue after February

Custom survey pre-launch checklist

Before you publish

- ☐ **1.** Brief agreed with the sponsor (objectives, audience, comparisons, confidentiality).
- ☐ **2.** Every question maps to an objective; scales labelled; Required only where needed.
- ☐ **3.** Demographic categories designed to stay above the minimum group size; minimum group size set (3 or more; raise for sensitive surveys).
- ☐ **4.** Logic built and every path walked in Preview.
- ☐ **5.** Anonymous Responses matches what the invitation and welcome message promise.
- ☐ **6.** Close Date, Maximum Responses (usually empty), Save and Continue, Data Retention set.
- ☐ **7.** Messages written: welcome, thank-you, closed.
- ☐ **8.** Languages translated and checked by a fluent speaker (if used).
- ☐ **9.** Test responses generated, results checked, **then deleted**.
- ☐ **10.** Roster prepared: headers match question text exactly; values match option labels.
- ☐ **11.** Distribution and reminder plan agreed; launch note ready.
- ☐ **12.** Reporting plan: who gets what, by when; how results go back to respondents.

Design rationale

(one page)

1 Decision and objectives

what Northwind will decide; your 2–4 objectives.

2 Question map

each question, its type, and the objective it serves (a small table).

3 Scales and wording

why these scales; how you kept June's item comparable.

4 Logic

what routes where, and how you tested it.

5 Confidentiality

anonymity setting and what it does and doesn't protect; demographic categories; minimum group size; your answer to Taylor's clinic-by-clinic request.

6 Distribution and reminders

roster vs QR/link for each group; reminder plan; how you'll track the response rate.

7 Languages

Spanish setup and who reviews the translation.

8 Reporting plan

what Alex and the council get by September 25, what you won't report, and how results go back to staff.
